## Mobile Developer

✉ fnandagustiawan@gmail.com ☎ +62 821-2735-5868 🌐 github.com/gustiawanfn 📍 Central Jakarta

### PROFESSIONAL SUMMARY

---

Mobile Developer with 6+ years of experience building and maintaining production-grade Android and Flutter applications across fintech, e-commerce, and government sectors. Proficient in Java, Kotlin, Flutter, and React Native, with a strong track record delivering mobile banking apps, sales monitoring platforms, and consumer apps in small agile teams. Comfortable owning the full mobile development cycle — from architecture and implementation to Play Store and App Store deployment.

### WORK EXPERIENCE

---

#### Android & Flutter Developer · **PT. Baron Biondi William** | June 2020 – Present | North Jakarta

- Developed and maintained 10+ production Android and Flutter apps within a 2–3 person team, covering fintech, banking, and enterprise domains.
- Built Mini ATM Hokki (Kotlin): implemented fund transfer, withdrawal, balance inquiry, and deposit flows on Android EDC hardware using ISO 8583 financial messaging protocol, with a focus on secure transaction handling and UX reliability.
- Maintained and extended Lestari Mobile (Java/Kotlin), a legacy m-banking app for BPR Lestari Bali with 50,000+ downloads — added Adjust analytics, revamped account opening flow with new video call SDK, and implemented cardless transactions. Also built LestariGo (Flutter) as a separate new product from scratch, targeting Android & iOS.
- Developed Danareksa Mobile (Android), a corporate mobile platform for PT. Danareksa to digitize internal operations and improve employee performance monitoring.
- Delivered 3 additional Flutter-based m-banking apps in 2025: Kertiawan Melody (BPR Kertiawan), CARYA (Bank CAR), and Danobile (BPR Dana Nagoya).
- Collaborated across mobile stacks: Java, Kotlin (Android), Flutter (cross-platform), and React Native (mCNI, IndoLinen).

#### Android Developer (Part-time) · **SaleSmart Indonesia** | 2023 – Present | Remote

- Developed Salesmart, a sales force automation platform — implemented offline-first architecture with Realm DB, dynamic menu & form builder (configurable menus with custom fields: text, dropdown, radio; data synced from API), batch sync on checkout, radius-based location validation for attendance & client check-in/out, periodic location polling for live tracking, mask detection on attendance, and real-time sales performance reporting.

#### Mobile Developer · **Self-employed** | 2026 | Jakarta

- Built a vehicle-based car rental tracking and booking platform, collaborating with a backend developer and marketing lead in a profit-sharing model.
- Solely responsible for the full Flutter mobile app (Android & iOS) — covering UI/UX implementation, booking flow, and vehicle tracking features.
- Reached early traction with 1 paying client (15 vehicles) in a closed beta via APK distribution.

#### Junior Programmer · **PT. Gria Inovasi Teknologi** | March 2019 – July 2020 | South Tangerang

- Developed Sifataru, an internal web application for Kementerian Agraria dan Tata Ruang (ATR) built with .NET Core, enabling operators to manage spatial and technical documentation more efficiently.
- Built PDAM Tirta Kahuripan (Web App): created features for customer bill management and pipeline monitoring integrated with GIS technology.
- Developed Hajj-Scanner (Android/Java): QR/Rfid-based attendance tracking for Hajj group leaders using handheld scanners.

## TECHNICAL SKILLS

---

**Languages:** Kotlin · Java · Dart (Flutter) · JavaScript (React Native)

**Mobile:** Android SDK · Flutter · React Native · Android EDC · Rugged/Handheld Android Devices (Seuic, RFID scanners)

**Architecture:** BLoC / Cubit · Provider (ChangeNotifier) · GetX · Clean Architecture · Repository Pattern

**Tools & Services:** Android Studio · Git · Firebase · REST API · Realm DB · ArcGIS Online (integration) · ISO 8583

**Platforms:** Play Store · App Store (via Flutter)

## EDUCATION

---

**S1 Teknik Informatika** — Universitas Kuningan | 2014 – 2019

**Menjadi Android Developer Expert** — Dicoding Academy | 2018

## SELECTED PROJECTS

---

*7 highlighted from 15+ production apps delivered:*

2019 **Sifatara** (.NET Core · ArcGIS Online) — Internal web tool for Kementerian ATR — urban planning document management with ArcGIS Online map integration

2021 **Danareksa Mobile** (Android) — Enterprise mobile platform for PT. Danareksa to digitize corporate operations

2022–Present **Lestari Mobile & LestariGo** (Java · Kotlin · Flutter) — Two separate products for BPR Lestari Bali — Lestari Mobile (legacy, 50,000+ downloads): added Adjust analytics, new video call SDK, cardless transactions. LestariGo: new standalone Flutter app built from scratch, pending Play Store & App Store release

2023 **Salesmart** (Android · Part-time) — Sales force automation app (5,000+ downloads) — offline-first with Realm DB, dynamic menu & form builder (configurable menus + custom fields: text, dropdown, radio), batch sync to API on checkout, radius-based location validation, periodic location polling, mask detection on attendance, and real-time sales reporting

2024 **Mini ATM Hokki** (Kotlin · Android EDC) — Banking EDC app with transfer, withdrawal, deposit & balance check flows

2024 **Paus Biru** (Flutter) — Freelance — dispenser water purchase app for schools & universities; reached 1,000+ downloads on Play Store

2026 **Barakah Travel Internal App** (Laravel · PHP) — Web app for tour & travel business — role-based access for staff & marketing, client registration with referral tracking, marketing bonus calculation, payment terms input, and reporting dashboard
